PERSONAL OPEN-SOURCE PROJECTS

Independent portfolio demos using synthetic data and mock systems.

LeadOps Intake and Triage

github.com/Shivam9864op/leadops-intake-triage

- Built a Node.js webhook demo that validates and normalizes leads, prevents duplicate processing, and routes sales, support and spam cases to human review.
- Included an n8n-compatible workflow template, mock CRM output, bounded retries, trace logs and tests for invalid inputs and delivery failures.

Safe Data Preview

github.com/Shivam9864op/safe-data-preview

- Created a local JSON utility that redacts common emails, phone numbers and secret-like fields and produces a redaction report.
- Used synthetic fixtures to check nested inputs, redaction results and safe handling of sample data.
